

# 【GitLab】push 觸發pipeline

Gitlab 專案的 settings -> integrations

設定 【url】 【token】 (見下方jenkins 設定)

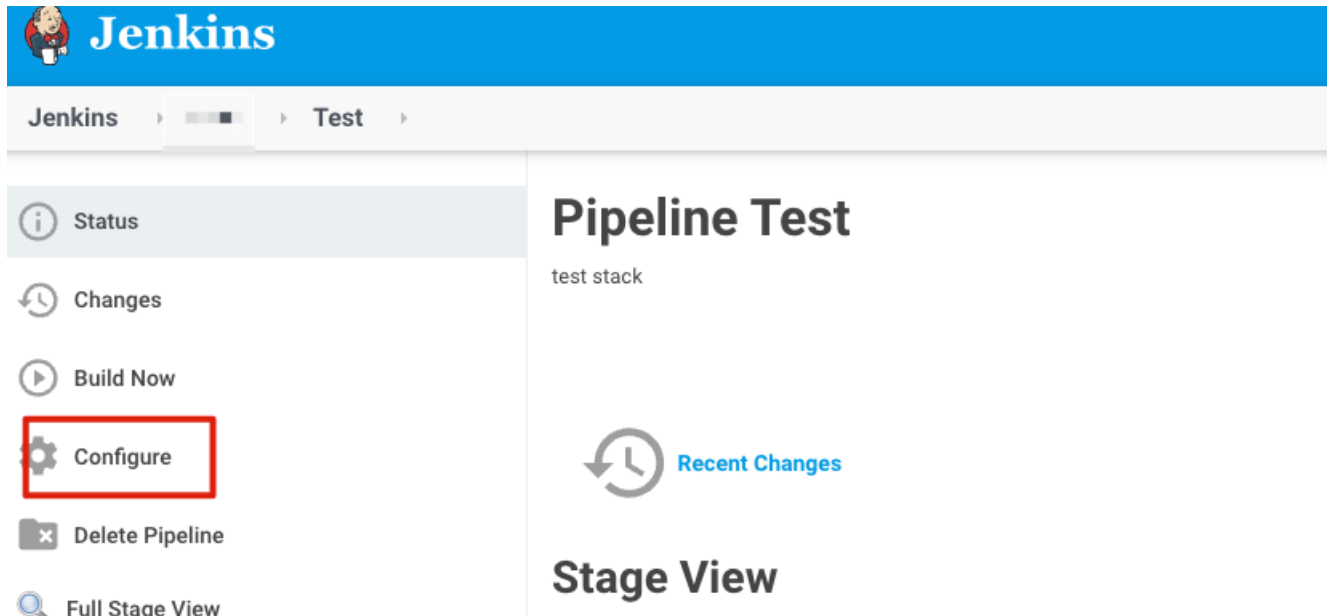

點選下方 【Test】 【Push events】 測試

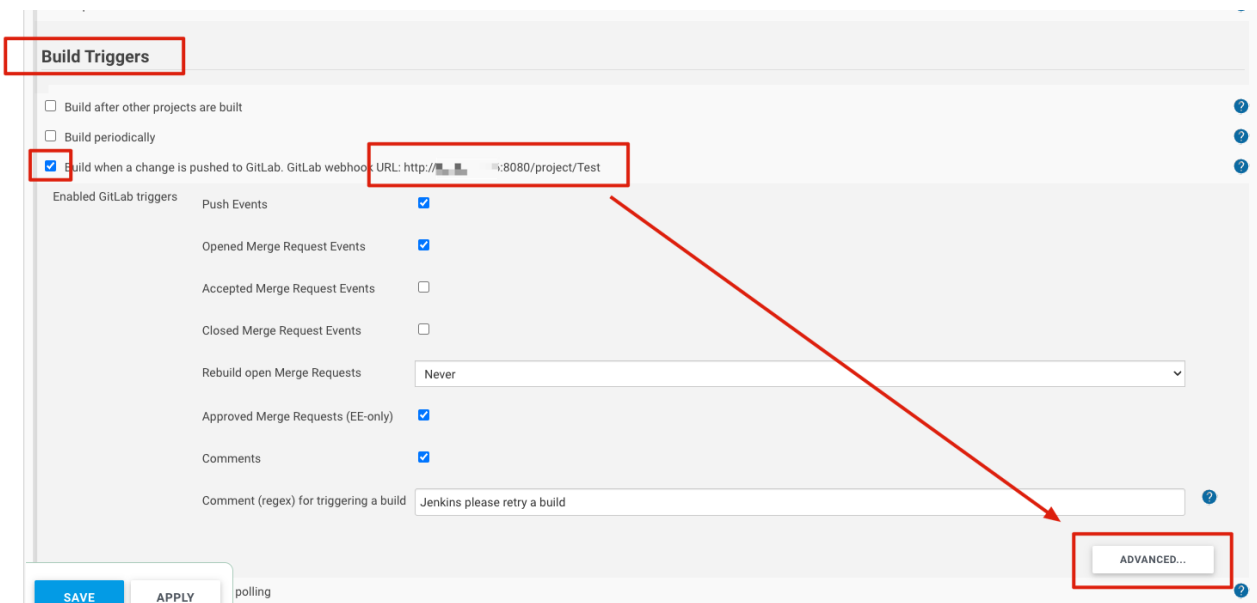

成功上方會出現藍色200字樣

## Jenkins (Url, token)

The image shows the Jenkins web interface for configuring a pipeline named "Pipeline Test". The top navigation bar includes "Jenkins" and "Test". The left sidebar contains several options: "Status", "Changes", "Build Now", "Configure" (highlighted with a red box), "Delete Pipeline", and "Full Stage View". The main content area displays the pipeline name "Pipeline Test" with a "test stack" label, a "Recent Changes" section with a clock icon, and a "Stage View" section.

The image shows the "Build Triggers" configuration form for the Jenkins pipeline. The form is titled "Build Triggers" and contains several sections. The "Build when a change is pushed to GitLab" section is highlighted with a red box. Below this, the "Enabled GitLab triggers" section lists various events with checkboxes: "Push Events" (checked), "Opened Merge Request Events" (checked), "Accepted Merge Request Events" (unchecked), "Closed Merge Request Events" (unchecked), "Rebuild open Merge Requests" (set to "Never"), "Approved Merge Requests (EE-only)" (checked), "Comments" (checked), and "Comment (regex) for triggering a build" (set to "Jenkins please retry a build"). A red arrow points from the "Build when a change is pushed to GitLab" section to the "ADVANCED..." button at the bottom right. The bottom of the form includes "SAVE" and "APPLY" buttons, and a "polling" label.

Approved Merge Requests (EE-only) ☒

Comments ☒

Comment (regex) for triggering a build

Enable [ci-skip] ☒

Ignore WIP Merge Requests ☒

Set build description to build cause (eg. Merge request or Git Push) ☒

Build on successful pipeline events ☐

Pending build name for pipeline

Cancel pending merge request builds on update ☐

Allowed branches

- ☒ Allow all branches to trigger this job
- ☐ Filter branches by name
- ☐ Filter branches by regex
- ☐ Filter merge request by label

Secret token
