

Laravel 建立專案

先安裝composer ，在切換到放置專案的目錄

```
composer global require laravel/installer
```

```
laravel new example-app
```

```
cd example-app
```

```
php artisan serve
```

修改參數

```
//config/app.php
```

```
'timezone' => 'Asia/Taipei',
```

```
'locale' => 'zh_TW',
```

```
'faker_locale' => 'zh_TW',
```

加上Vue

[laravel8 + vue3.0 + element-plus 搭建 | IT人 \(iter01.com\)](#)

[Laravel SPA with Vue 3, Auth \(Sanctum\), CRUD Example - Shouts](#)

🕒修訂版本 #5
