# 【Lua】錯誤處理

```lua
local status, err = pcall(function()
    -- 可能会出□□□的代□
    local result = some_function()
    ngx.print("Result: ", result)
end)

if not status then
    -- 出□□□□的处理
    ngx.log(ngx.ERR, "Error occurred: ", err)
    ngx.status = 500
    ngx.print("An error occurred. Please try again later.")
end
```
