

# 【Lua】安裝 luarocks

<https://github.com/luarocks/luarocks/wiki/Download>

<https://github.com/luarocks/luarocks/wiki/Installation-instructions-for-Unix>

```
apt-get update
apt install build-essential libreadline-dev unzip wget zlib1g-dev -y

#安裝 luarocks
wget https://luarocks.org/releases/luarocks-3.8.0.tar.gz && tar xpf luarocks-3.8.0.tar.gz && cd luarocks-3.8.0
./configure
make && make install

#安裝 lua-resty-http
luarocks install lua-resty-http
#安裝 lua-ffi-zlib
luarocks install lua-ffi-zlib
```

## install lua-zlib

[https://blog.51cto.com/u\\_5650011/5394910](https://blog.51cto.com/u_5650011/5394910)

```
cd /usr/local
wget https://github.com/brimworks/lua-zlib/archive/master.zip
unzip lua-zlib-master.zip
```

```
cd /usr/local/lua-zlib-master
cmake -DLUA_INCLUDE_DIR=/usr/local/openresty/luajit/include/luajit-2.1 -DLUA_LIBRARIES=/usr/local/openresty/luajit/lib -
DUSE_LUAJIT=ON -DUSE_LUA=OFF
```

```
make
cp zlib.so /usr/local/openresty/lualib/zlib.so
```
