

【Mac】安裝MongoDB

```
brew tap mongodb/brew
```

```
brew update
```

```
brew install mongodb-community@6.0
```

<https://www.mongodb.com/docs/manual/tutorial/install-mongodb-on-os-x/>

或是使用docker-composer

*docker-compose.yml

```
version: '3.1'

services:

  mongo:
    image: mongo:6.0
    restart: always
    container_name: mongo1
    volumes:
      - ./data:/data/db:/data/db
    ports:
      - 27017:27017
```

```
#起動 docker
docker-compose up
```

🕒修訂版本 #3
